Android video & photo editor application using deep learning (Super Resolution, Video & Image Inpainting) Simple Video Editor is an Android application that can help the work of video, image inpainting. Although it is not for this purpose, it has enough function as a video editor. You can use video-time-line view, video cropping based on the ffmpeg engine, and select a specific frame to draw a line. Main feature of the Play Video UI Select to trim video Select the specific frame and draw a Sebd form on the server What is inpainting ? Inpainting is a conservation process in which damaged, deteriorated, or missing parts of a work of art are filled to present a complete image. As a rule, the original file and the corresponding binary mask file are required to test the inpaintng. How to generate a mask file in Android In the app logic, a user will draw lines on the specific frame (or photo). So I converted the frame (or photo) to bitmap and got the RGB pixel value of the bitmap. If an RGB pixel of the bitmap exceeds a specific threshold, the pixel is mapped to 0 value Resize the bitmap to the same height and width as the original file. Result ✓ Check @jsh-me 📧 This project is WIP Feel free to contact me if you have any questions. Always welcome to FEEDBACK :) pending your contribution. Android app - video maker, photo collage This project was developed as part of the assignment of my Java class. It is no longer up-to-date or supported. Android video manipulation app support I am very open to receive help for this open source project. If you have any suggestions, criticisms or questions feel free to contact me! License This project is gnu gpl software. See COPYING for the full license. Syntax (developers) When compiling this library for the first time, you must complete a few steps: Download ffmpeg library git clone app/src/main/jni/ffmpeg/ Build ffmpeg ./app/src/main/jni/build_ffmpeg.sh Compile libvc.so. Uncomlish a block of code in app/build.gradle: // Debug Task /* // Disable implicit Android.mk creation for all variants Custom tasks that build libraries with ndk-build using the custom makefile //noinspection GroovyAssignabilityCheck task ndkBuildDebug(type : Exec) { // Retrieve the NDK directory from the local.properties property properties = new Properties()load(project.rootProject.file("local.properties").newDataInputStream()) def ndkDir = properties.getProperty("ndk.dir") println(DEBUG) commandLine commandLine commandLine NDK_DEBUG=0, -B, // Force a reconstruction 'NDK_PROJECT_PATH=build/intermediates/ndk', 'NDK_LIBS_OUT=src/main/jniLibs', 'APP_BUILD_SCRIPT=src/main/jni/Android.mk', 'NDK_APPLICATION_MK=src/main/jni/Application.mk' } tasks.whenTaskAdded { task -> if (task.name == 'compileDebugJava') { task.dependsOn ndkBuildDebug } }* Note: This code should not be commented on only when: you are compiling for the first time (and lib does not yet exist) Changes have been made in native source code, such as vc.c <4> Currently, your app can do the following: Analyze a video file you choose View analyzed streams and their attributes so that tree Concatenate multiple videos (resize and re-encode if necessary) Select, play, and concat different audio streams Future expansion improvements of this app depend heavily on the functionality of the FFmpeg and FFprobe libraries that underseat this tool. Currently scheduled video edits include: Resize Cropped Image Overlay Adding Extra Audio Streams Pre-Installed Transitions I need video footage stitched together. It became 2-3 speakers, showing an existing logo and then a new logo and maybe some slides. This will be recorded on an HD camera and therefore must be stiched together. I expect it to be about 20 minutes. I'm looking for smooth transitions. High quality appearance/feeling. If possible, I might want to look like we're changing our position between... You just need a mini web app that can edit videos. Don't worry too much about the design, I just need the basic code. It is hoped that the canvas elements. Requirements: - Add video to timeline |---this adds the video to a timeline - Can add more videos |--- each video gets its own level - With the timeline, each video has a draggable object - It can drag levels above/below each other - Can trim the video... I'm looking for developers to create a signal app for actions and options. The app should have options to buy attractive signals via credit card or using the App store I'm looking for something similar, but it should have option for trading stocks and options [login to view URL] Please make an offer only if you did a previous project similar to the signal development app. We want to see your port... You just need a mini web app that can edit videos. Don't worry too much about the design, I just need the basic code. It is hoped that the canvas elements. Requirements: - Add video to timeline |---this adds the video to a timeline - Can add more videos |--- each video gets its own level - With the timeline, each video has a draggable object - Can drag levels above/below each other - Can tr ... I have a web page. This page is a cash prize quiz. the page has some issues and I want to turn it into a mobile application because I want some extra features. After the offers, I will contact and give to a user for the test. I will also specific the features I want. 1- There is a section on mutual competition on the website. I want this done again. New. Now there is a webview version ... I have a video and I would have more on an ongoing basis so I need HTML. They are videos of less than 3 minutes. I can send you an email. The video comes from my GoogleFi phone. Give me a video fee. Let's start with one. For videos, Flexmls requires you to paste HTML code to embed the video in the MLS webpage. HTML (also known as Hyper Text Markup Language) is the standard markup language used for... Hola! Soybean profe de inglés y se me presenteddo la oportunidad de un nuevo reto para el que necesito ayuda. He diseñado un mini più online donde se explica la diferencia de terminología español/inglés en el sector jurídico. Suena muy raro pero es simple enseñar que contratación se dice recruitment en ingl&e... Ironbound Films is an award-winning video and animation production company. Founded in 2003, we've created countless videos for Fortune 500, startups, and nonprofits around the world. You can read more about Ironbound here: [login to view URL] Ironbound is looking for a remote intern to get started immediately, to assist in editing projects. The candidate should have Adobe Premiere and guide the space to... I need to create an iOS and Android web app. It's actually just creating an app where you'll just have to open an ecommerce already online. Nom will have to give us the opportunity to exit the link in question. Each time the APP is launched, the home page of the site must be uploaded. Site: [login to view URL] Task1: hardware software configuration, which I can be on my own, but depending on each case, I may need your help. Please look below for the software details I'm going to use Task2: Add sensors and gadgets including camera and communication devices (Lorawan for example) Activity 3: Collect data for obstacle detection and follow a predefined path. Simulation based on Gazebo and Qground Con... MAKE AN OFFER ONLY IF YOU ARE AN EXPERIENCED MAAHIR DISCLAIMER medical advice DEVELOPER • If you are feeling sick right now, then you should contact your local emergency service. • This service does not replace a formal consultation with your local doctor or specialist • We can only offer general advice, according to opinion where required and signage for further useful information PLEASE... Hi we are a painting and decorating company looking to hire someone to create a video for our franchise business. The video is to promote franchise opportunities. We will provide some movies and images, but you will also need to use stock photos. We are modern painters and decorators who use airless spraying systems so you can't have roller hand brushes in stock images or shooting. Nee... I need an app made in Android Studio. The app should look like found here: [login to view URL] Plus a few more screens with the specs I'll give you. Please let me know if you can. Consider including the CAP in the topic. I have a showreel video of my services and past work I need to be treated. The video has background music and lyrics. I have to change the logo in the video I will provide and the text must be done in English and German. Currently, it is in my native language and I will provide translations. Here's the Youtube link to the video: [login to view URL] It's free to sign up, type in what you need, and receive free quotes in seconds
